

## **AFRICA ALBIDA TOURSIM COVID-19 PROTOCOLS**

Due to the Covid-19 pandemic we at Africa Albida Tourism have evolved our health and safety protocols in line with WHO and government guidelines, to safeguard the health and safety of our guests and staff. We trust that the protocols we have implemented will give all our guests peace of mind when visiting this magnificent Natural Wonder of the World, and at the same time ensure that the guest experience with us is affected as little as possible.

Measures that we have put in place across the Victoria Falls Safari Lodge estate include temperature screening for both guests and staff, the regular disinfecting of facilities, controlled staff-guest interaction, the mandatory wearing of face masks in public areas and well-spaced tables at the onsite restaurants. Onsite activities like the Vulture Culture Experience are done with fewer people at a time to allow for social distancing, while outsourced activities are booked with operators whose Covid-19 protocols are approved by the relevant authorities.
